

# project architect - healthcare focus

## (opportunities across multiple sectors)

### About This Job:

We are looking for an experienced Healthcare Project Architect to join our firm. This role will primarily focus on healthcare projects, but there will also be opportunities to contribute to other project types including educational, governmental, and commercial work. Our ideal candidate is a talented, licensed architect and designer who is well-organized, creative, an excellent communicator, interested in designing in multiple market sectors, and is looking for professional growth and responsibility. Daily responsibilities include leading a design team within the office as well as coordinating with outside consultants and project stakeholders. HDG encourages your own imaginative thinking and design process and looks forward to expanding our Firm's creative basis by incorporating your strengths into our workflow.

### In your New Role, You Will:

- Lead multidisciplinary project teams and consultants, primarily on healthcare projects, while having the opportunity to contribute to other project types.
- Manage multiple aspects of client, team, and project coordination.
- Serve as the main point of communication between project team, clients, vendors, contractors and consultants.
- Collaborate with the Marketing Manager to review and contribute to proposals, prepare presentation materials, statements of qualifications, assemble consultant teams, and participate in client interviews.
- Lead presentations of design ideas, concepts, and milestone reports to clients.
- Provide technical guidance and innovative solutions to resolve complex design and construction challenges.
- Develop project specifications based on technical requirements for healthcare and other project types.
- Conduct on-site observations, attend construction meetings, review submittals and respond to RFIs and substitution requests during the construction administration phase.
- Establish and maintain ongoing, productive client relationships.
- Participate in Strategic Planning Committees, aligning with your interests, for the establishment of firm wide goals and ongoing review and improvement of office culture, efficiency, and production.
- Mentor team members and assist in project detailing and construction.
- Guide and mentor less experienced designers in all aspects of professional development.
- Work closely with firm leadership to manage overall project delivery and administration.

### Candidates Should Have:

- 10+ years of relevant healthcare architectural experience with a portfolio demonstrating project work.
- Accredited Bachelor's or Master's degree in architecture.
- Architectural Registration required.
- Expertise in Revit and Proficiency in Bluebeam.
- Strong leadership, communication, and relationship management skills.
- Ability to manage a project from conceptual design through construction.
- Ability to coordinate and lead a team of design professionals.
